

Ammonia & CO₂ based Industrial Process Cooling & Heat Pumps

- Low GWP Refrigerant
- Efficient
- Eco-Friendly
- Heat Recovery / Hot water Generation
- Two stage and Cascade System for Low and Ultra low Temperature applications
- Built in Efficient Oil Management System
- Dedicated Automation with reputed make controllers
- Skid Mounted Factory wired
- Customized design to suit the user requirement
- Energy Efficient Screw / Reciprocating Compressors
- VFD – Efficient part load operation (optional)
